RITIK CHAUHAN

+91-6397509639 ritikchauhan2068@gmail.com LinkedIn Github

Summary

To use my skills in Python, backend development, automation, AI/ML, and problem-solving to solve real-world technical challenges, take responsibility for my work, and grow professionally in a growth-oriented organization.

Education

Bachelor of Technology – Computer Science and Engineering 2021 – 2025
Chaudhary Charan Singh University, Meerut *CGPA: 7.74 / 10.0*

12th (Intermediate) – PCM and Computer 2019 – 2020
D.A.V. Centenary Public School, Haldwani *Percentage: 80%*

Technical Skills

- **Programming Languages:** Python, SQL, C++, Java
- **Data Analysis & Statistics:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Descriptive Statistics, Inferential Statistics, Hypothesis Testing, Correlation Analysis
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Feature Selection, Model Training, Model Evaluation, Hyperparameter Tuning
- **Deep Learning & AI:** Neural Networks, Deep Learning, Transformers, RAG, Large Language Models (LLMs)
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Keras, LangChain, Hugging Face
- **Tools & Technologies:** Excel, MySQL, Jupyter Notebook, Git, GitHub, FastAPI, Web Scraping

Experience & Projects

Data Scientist Intern Feb 2024 – Apr 2024
InternPe, Remote

- Analyzed historical IPL match data and built a match outcome prediction model using Scikit-learn, evaluating 5 classification algorithms and applying GridSearchCV for hyperparameter tuning, reducing prediction error by 20%
- Performed data cleaning, exploratory data analysis, and feature engineering to identify relevant patterns and prepare datasets for model training and evaluation
- Evaluated model performance using classification metrics and deployed the selected model through a FastAPI REST API for real-time predictions

Flat Recommendation Engine | *Python, FastAPI, Scikit-Learn, Web Scraping* | ***GitHub***

- Collected, cleaned, and normalized 10,000+ property listings from 99acres using BeautifulSoup and engineered features including price-per-sqft, locality tier, and weighted amenity scores
- Performed feature analysis and implemented a content-based recommendation system using TF-IDF and cosine similarity, achieving an 18% improvement over a keyword-search baseline on a 500-listing test set
- Built a FastAPI recommendation API to generate Top-N ranked property recommendations.

Order Automation System (Testing Period) | *Python, FastAPI, Google Sheets API, OCR* | *GitHub* | **Client Project**

- Designed a data extraction and processing pipeline to capture order information from WhatsApp messages, PDF invoices, and product images using OCR
- Achieved 90%+ field-extraction accuracy for item names, quantities, and unit prices, automatically validating and recording processed orders in Google Sheets
- Automated repetitive order-entry and data-processing tasks, saving 2+ hours of manual work per day and replacing a paper-based ledger workflow with a digital process

Freelance Backend Developer Jan 2025 – Present
Self-Employed – Remote | *Clients:* ***Heritage Almora, Auyrcopharma***

- Developed production web applications using FastAPI and JavaScript, supporting customer inquiries and business operations for real-world clients
- Developed an Ayurvedic e-commerce platform using FastAPI and a database, analyzing API performance and optimizing response handling to reduce page load time by 35%
- Deployed and maintained 2 production applications using DigitalOcean and Render, managing application data, DNS configuration, SSL certificates
- Gathered requirements from non-technical clients, translated business needs into technical solutions, and delivered applications within agreed scope and timelines

Certifications & Leadership

- **Generative AI for Data-Driven Business Decision-Making (30-Day Workshop)** – *IIM Mumbai (MIT x NSDC)*: Studied data-driven decision-making and Generative AI under Prof. David Simchi-Levi; analyzed the Mercedes-Benz case study to extract strategic business insights.
- **College Data Analysis Hackathon – Team Lead**: Directed a 5-person team through a 24-hour sprint to process real-world datasets, engineer key metrics, and deliver actionable findings to a panel of judges.
